

# NORTHERN AROOSTOOK BUDWORM TREATMENT STARTS SOON

## Here's what you need to know:

The Early Intervention Strategy Program for Spruce Budworm is planned to begin as early as May 26, 2026 to target forested areas enrolled in the program with insecticides to reduce building spruce budworm populations.

- ATV trails will be closed during the program and private roads may be temporarily closed
- Helicopters in the program may be flying low
- Insecticides will only be applied to forested areas that have been enrolled in the program by their landowners
